Why is Chrome (specific to this PC) loading the legacy plugin for Windows Media files? What can I do to get it to load the correct version as the legacy one does not play streams reliably? Below is a excerpt from my about:plugins.. I'll test the trick again on windows 7 when I get a round tuit Caveat: On a windows 7 box _without_ Firefox the Microsoft installer for this legacy plugin puts it in a new directory Pfiles. Oops, I completely misunderstood the regedit trick, it is not meant to be used *instead* of the legacy netscape plugin, but in *addition* to this plugin.. I have tried to enter my PID and it was answered in the correct format but it keeps telling me it's wrong.. It is not possible, let alone necessary, to delete the 'mplayer2' UI Please correct me if I'm wrong.. Ugly, but I do not

intend to install Firefox as long as Chrome works for me Back to original problem: AFAIK 'mplayer2' is just the legacy user interface, the better media players fix many relevant registry entries to use new codecs even if you start mplayer2.. >> Windows Media Player Plugin Test >>>> shows no player, and About:Plugins shows no Windows Media Player Plugin.. >> So how do I find and install this in Opera (Running Vista) -- Rijk van Geijtenbeek Opera Software ASA, Documentation & QA Tweak: 'The most common way to get usability wrong is to listen to what users say rather than actually watching what they do.. Mime Application X Mplayer2Windows password reset crack keygen Apple Footer This site contains user submitted content, comments and opinions and is for informational purposes only.. The number I was using was-89572-OEM-726 Chrome is choosing the legacy WMP for all embedded Windows Media file types instead of the more current and feature rich WMP11 (wmplayer. 773a7aa168 [Free Download Archicad 18 For Mac](#)
